As this 231 Massey Ferguson, it ends stirring instinctive one of the favored books 231 Massey Ferguson collections that we have. This is why you remain in the best website to see the incredible books to have.

Chicago, Cook County, and Illinois Industrial Directory 1982

The Big Book of Massey Tractors Robert N. Pripps 2006 This is the first full-scale history of one of the largest farm tractor manufacturers of all time, peppered with pictures of Massey-Harris, Ferguson, and Massey Ferguson's historic models, collectibles, sales memorabilia, and advertisements from old farm magazines. The Big Book of Massey Tractors tells the story of the mergers and machines that formed Massey Ferguson over several decades, and—because these machines dominated Canadian farms for almost a century—in many ways it also tells the story of Canadian agriculture. Robert Pripps, a longtime tractor aficionado, describes Massey Ferguson's battle with Ford over dominance of the farm tractor industry—a battle the company eventually won, remarkably enough, in view of its initial abject market failure with tractors. From the company's beginnings in 1891, to its 1953 merger with the Ferguson tractor company, to its current ownership by Allis-Gleaner Company (AGCO), Masseys have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.

The Impact of Globalization on Argentina and Chile Geoffrey Jones 2015-09-25 During the first global economy of the late nineteenth century and early twentieth century, Argentina became one of the richest countries on earth, while Chile was an economic backwater. During the contemporary era of globalization, liberalization and institutional reforms in Chile provided a context in which business grew, while in Argentina, institutional dysfunction made productive business hard to sustain. This book explores the complex relationships between corporate behavior, institutions and economic growth through the contrasting experiences of Argentina and Chile. In nine chapters written by prominent business historians, the work addresses the role of business in these two eras of globalization, examining the impact of multinationals, the formation of business groups, and relations between business and governments. It places the regional experience within the context of the worldwide history of globalization.

A Dam for Africa Stephan F. Miescher 2022 Since its construction in the early 1960s, the hydroelectric Akosombo Dam across the Volta River has exemplified the possibilities and challenges of development in Ghana. Drawing upon a wealth of sources, A Dam for Africa investigates contrasting stories about how this dam has transformed a West African nation, while providing a model for other African countries. The massive Akosombo Dam is the keystone of the Volta River Project that includes a large manmade lake 250 miles long, the VALCO aluminum smelter, new cities and towns, a deep-sea harbor, and an electrical grid. On the local level, Akosombo has meant access to electricity for people in urban and industrial areas across southern Ghana. For others, Akosombo inflicted tremendous social and environmental costs. The dam altered the ecology of the Lower Volta, displaced 80,000 people in the Volta Basin, and affected the livelihoods of hundreds of thousands of Ghanaians. In A Dam for Africa, Stephan Miescher explores four intersecting narratives: Ghanaian debates and aspirations about modernization in the context of decolonization and Cold War; international efforts of the US aluminum industry to benefit from Akosombo through cheap electricity for their VALCO smelter; local stories of upheaval and devastation in resettlement towns; and a nation-wide quest toward electrification and energy justice during times of economic crises, droughts, and climate change.

American Firms in Europe Hubert Bonin 2009 The processes of the Americanisation of Europe and the moves of American firms abroad have been already well studied. But the very expansion of American firms in Europe still lacked a comprehensive survey. This book gathered two dozens of academics on an actual European level, which paves the way to comparisons, synthesised by leading business historian M. Wilkins. The breakthroughs achieved here concern the topics of timetable and rhythms of American FDIs in Europe, the patterns followed in each country, along with the specificities of each industry or service sector, and the strategy adopted by big firms. Beyond the facts, the immaterial aspects of this business history are scrutinised, especially about the perception of American firms by Europeans: firms' corporate image and identity were at stake. The Europeanisation of American firms is a key issue, about industrial relations, management, commercial policies, brand image, connections and embeddedness. The positions of public authorities and of (industrialists and trade unions') lobbies in front of such an American offensive are also gauged. Graphs and tables of figures provide numerous data. And a few chapters are accompanied by an overview of ads published by American affiliates in newsmagazines, to fuel analysis of their perception by consumers.

Implement & Tractor Robert K. Mills 1986 Descriptions, photographs, and illustrations of farm equipment, including advertisements.

The Massey Legacy J. Farnworth 1997 This is the first volume of a two-volume set, offering a comprehensive review of the range of products manufactured or marketed by Massey-Ferguson and its predecessor companies from 1847. This volume includes a survey of agricultural tractors, a chronology of the company, and other data.
