[A Contemporary Nursing Process](#) Dr. Rozzano C. Locsin, RN, PhD, FAAN 2009-04-10 "[This book] speaks against thinking [that] we can only understand nursing from a traditional, logical, empirical approach, suggesting we need a contemporary process for exploring nursing. I can't agree more." --Journal of Christian Nursing "Nurse scholars from across the globe contribute essays to this unique philosophical exploration of today's nursing. This book presents an emerging view that requires nursing to look at its work through a broader and less structured lens. Challenging the structure of the traditional nursing process, the book considers nursing as reflective and thoughtful." --Doody's A Contemporary Nursing Process re-envisions the practice of nursing by configuring caring in terms of the person the nurse cares for. **Theoretical Nursing** Afaf Ibrahim Meleis 2011 "An additional assumption was that the processes for theory development were new to nursing and hence, nurses in graduate programs learned strategies for advancing knowledge from other disciplines. This assumption was debunked with the knowledge that nurses were always engaged in knowledge development, driven by their experiences in clinical practice. Because of these assumptions, most of the early writing about theory development was about outlining strategies that should be used, rather than strategies that have already been used in the discipline to develop theories. Theorists themselves did not uncover or adequately discuss ways by which they developed their theories, therefore the tendency was to describe processes that were based on theories developed in other disciplines, mainly the physical and social sciences. And an implicit assumption was made that there should be a single strategy for theory development, some claiming to begin the process from practice, and others believing it should be driven by research"--Provided by publisher.

**Pioneering Theories in Nursing** Austyn Snowden 2014-09-03 Pioneering Theories in Nursing traces the origins of nursing theories through their founders. Unlike other nursing theory texts, this book provides the personal story on some of the greatest nursing leaders, clinicians and theorists to date so the reader can understand the context within which the nursing pioneer developed their theory. It will attempt to explain the theories and practice of nursing and provide food for thought for students and practitioners, encouraging reflective thinking. Each section begins with an overview of the chapters and identifies common themes. Designed to be highly user-friendly, each chapter follows a standard structure with a short biography, a summary on their special interests and an outline of their writings before each theory is examined in detail. The chapter then looks at instances of how this theory has been put into practice and what influence this process has had on the wider nursing community. Further links to other theorists are provided as well as key dates in the life of the theorists and a brief profile.
