**Constructing (in)competence** Dana Kovarsky 2013-06-17 Competence and incompetence are constructs that emerge in the social milieu of everyday life. Individuals are continually making and revising judgments about each other's abilities as they interact. The flexible, situated view of competence conveyed by the research of the authors in this volume is a departure from the way that competence is usually thought about in the fields of communication disabilities and education. In the social constructivist view, competence is not a fixed mass, residing within an individual, or a fixed judgment, defined externally. Rather, it is variable, sensitive to what is going on in the here and now, and coconstructed by those present. Constructions of competence are tied to evaluations implicit in the communication of the participants as well as to explicit evaluations of how things are going. The authors address the social construction of competence in a variety of situations: engaging in therapy for communication and other disorders, working and living with people with disabilities, speaking a second language, living with deafness, and giving and receiving instruction. Their studies focus on adults and children, including those with disabilities (aphasia, traumatic brain injury, augmentative systems users), as they go about managing their lives and identities. They examine the all-important context in which participants make competence judgments, assess the impact of implicit judgments and formal diagnoses, and look at the types of evaluations made during interaction. This book makes an argument all helping professionals need to hear: institutional, clinical, and social practices promoting judgments must be changed to practices that are more positive and empowering.

**The Kindertransport** Jennifer Craig-Norton 2019-06-25 Jennifer Craig-Norton sets out to challenge celebratory narratives of the Kindertransport that have dominated popular memory as well as literature on the subject. According to these accounts, the Kindertransport was a straightforward act of rescue and salvation, with little room for a deeper, more complex analysis. This volume reveals that in fact many children experienced difficulties with settlement: they were treated inconsistently by refugee agencies, their parents had complicated reasons for giving them up, and their caregivers had a variety of motives for taking them in. Against the grain of many other narratives, Craig-Norton emphasizes the use of archival sources, many of them newly discovered testimonial accounts and letters from Kinder to their families. This documentary evidence together with testimonial evidence allows compelling insights into the nature of interactions between children and their parents and caregivers and shows readers a more nuanced and complete picture of the Kindertransport.

**Trauma and Attachment in the Kindertransport Context** Iris Guske 2009-03-26 The present volume is the result of an interdisciplinary oral history research project, which was carried out at the Centre for German-Jewish Studies at the University of Sussex. It focuses on the Kindertransport, the British rescue operation saving 10,000 predominantly German-Jewish children from Nazi Germany, and is based on in-depth case studies of five child survivors of the Holocaust. Looking at human development over the life cycle as mediated by intervening trauma was at the heart of the project, which examined the making and breaking of a child's close ties to significant others, processes of identity formation under acculturative stress as well as the creation and recall of traumatic memories. The study is thus one of the few in the field of attachment research which sheds light on the lifelong influence which early attachment has on coping with massive cumulative trauma. The former child refugees' narratives are enriched by letters, diaries, or articles written by them and their (host) families as well as by interviews conducted with family members and friends. Consequently, we can look at individual lives and collective destinies from more than one perspective as we are provided with rich, multi-layered accounts of people's whole-life trajectories. While each Holocaust survivor's developmental story is unique, it is, however, linked to the others' by the common experience of negotiating an identity between two countries, cultures, and religions against the background of unparalleled political upheavals, and as such also sheds light on, and offers ways out of, the traumata suffered in present-day contexts of enforced migration and displacement.

*Stress bij kinderen* Jan van der Ploeg 2013-08-17 Stress komt niet alleen voor bij volwassenen, maar ook bij kinderen. Jarenlang is stress bij jeugdigen onderschat. Kinderen en jongeren maken wel degelijk stress mee; soms incidenteel, soms dagelijks. Dit boek laat zien wat stress betekent voor jeugdigen. Aan de orde komen onder meer een nadere typering van het begrip stress, mogelijke bronnen van stress, het omgaan met stress en de gevolgen van stress. Ook geeft het boek antwoord op de vraag wat professionals, leerkrachten en ouders kunnen doen als kinderen en jongeren gebukt aan onder te veel stress.

**Resisting the Kinder-Race** Christopher P. Brown 2021 Kindergarten has changed. Many believe that it no longer reflects a nurturing environment but, instead, has become a race for children to learn skills so they are ready for the academic achievement tests that they will take continuously throughout their time in school. Resisting the Kinder-Race examines how the race came about, why it must change, and how all stakeholders in the early childhood and elementary school communities must take part in the reform process. The author draws on his own research to consider how the Kinder-Race might be reimagined through more democratic principles of schooling. Brown offers both practical and political strategies that can alter the day-to-day practices of the kindergarten classroom and the policies that currently define PreK-12 education in the United States. This resource will help readers see kindergarten as an educational environment that expands the learning of every child. Book Features: Provides an in-depth glimpse into a typical day in the Kinder-Race.Examines how kindergarten devolved from a garden that nurtures children into a race that dashes them from skill to skill.Brings together what are often siloed conversations among stakeholder groups.Highlights how kindergarten is now primarily defined through an economic lens and how this framing of learning, earning, and consuming might be rethought. Employs varied conceptual frameworks to investigate how stakeholders across different levels of public education make sense of the changed kindergarten.Illuminates the complexity of what is occurring in today's kindergarten and puts forward practical and achievable ideas for change.

A Kinder, Gentler America Mary Caputi 2005 "In the Norman Rockwell paintings of the 1940s and 1950s," wrote Newt Gingrich, "there was a clear sense of what it meant to be an American." Gingrich's words underline what Mary Caputi sees as a desire of the neoconservative movement to set a foundation for modern America that ennobles the past. Analyzing these competing uses of the past, A Kinder, Gentler America reveals how longing for the era of "the greatest generation" actually exposes a disillusionment with the present. Caputi draws on the theoretical frameworks of Julia Kristeva and Walter Benjamin to look at how the decade has been portrayed in movies such as Pleasantville and Far from Heaven and delves further to investigate our disenchantment's lost origins in early modernity through a reading of the poetry of Baudelaire. What emerges is a stark contrast between the depictions of a melancholic present and a cheerful, shiny past. In the right's invocation of the mythical 1950s and the left's criticism of the same, Caputi recognizes a common unfulfilled desire, and proposes that by understanding this loss both sides can begin to accept that American identity, despite chaos and confusion, lies in the here and now. Mary

Caputi is professor of political science at California State University, Long Beach, and is author of *Voluptuous Yearnings: A Feminist Theory of the Obscene*.

*This Book Will Make You Kinder* Henry James Garrett 2020-10-20 'Heart-swelling in its wholesomeness' - Gina Martin 'A reminder of the life-changing power of empathy' - Emma Gannon Why are you kind? Could you be kinder? The kindness we owe one another goes far beyond everyday gestures like taking out the neighbour's bins - although it's important not to downplay those small acts. Kindness can also mean much more. In this timely, insightful guide, Henry James Garrett lays out the case for developing a strong, courageous, moral kindness, one that will help you fight cruelty and make the world a more empathetic place. Building on his academic studies in metaethics and using his signature sweet animal cartoons, Henry explores the sources and the limitations of human empathy and the many ways, big and small, that we can work toward being our best and kindest selves. A world in which everyone was the fully-empathetic of version of themselves would be a very kind world indeed. And that's the world this book will move us toward.

*The Forgotten Kindertransportees* Frances Williams 2013-11-21 *The Forgotten Kindertransportees* offers a compelling new exploration of the Kindertransport episode in Britain. The Kindertransport brought close to 10,000 unaccompanied children and young people to Britain on a trans-migrant basis between 1938 and 1939, with an estimated 70% of these children being of the Jewish faith. The outbreak of the Second World War turned this short-term initiative into a longer-term episode and Britain became home to the thousands that had been forced to migrate across the continent to flee the Nazis and the tragic Holocaust that would take place. This book re-evaluates and challenges misconceptions about the Kindertransportees' experiences in Britain - misconceptions that currently pervade Kindertransport scholarship. It focuses on the particularity of the Scottish experience, scrutinising misleading national pictures, which have dominated existing literature and excluded this important part of the Kindertransport episode. An estimated 8% of Kindertransportees were cared for in Scotland for the duration of the war years and this book demonstrates how national agendas were put into practice in a region that was far removed from the administrative and bureaucratic hub of London. *The Forgotten Kindertransportees* provides original interpretations as it considers a number of important aspects of the Kindertransportees' experiences in Scotland, including those of a social, political and religious nature. This includes an

examination of Scotland's philanthropic welfare solutions for the dependent trans-migrant minor, the role of Zionism and the impact of Scottish-Jewry's particular approach to Judaism and a Jewish lifestyle upon broader life stories of Kindertransportees. Using a vast body of new research material, Frances Williams provides a fascinating and detailed examination of the Kindertransport that is region-specific and one that is all the more important because of its specificity. This is an important text for anyone interested in the Holocaust and the social history of those involved.
