Dynamics of Transformation Hiroyuki Takeshima 2013-06-21 Agriculture in African South of the Sahara (SSA) can be transformed if the right public support is provided at the initial stage, and it can sustain itself once the enabling environment is put in place. Successes are also specific to the location of projects. In Ghana, interesting insights are obtained from the successful Kpong Irrigation Project (KIP), contrasted with other major irrigation projects in the country. Through an exploratory review, we describe how a productive system evolved in KIP and how public support for critical aspects (accumulation of crop husbandry knowledge, selection and supply of profitable varieties, and mechanization of land preparation) might have created a productive environment that the private sector could enter and fill in the market for credit, processing, mechanization of harvesting, and other institutional voids that typically have constrained agricultural transformation in the rest of SSA. Slower progress in other projects also raises a number of questions. We conclude by summarizing those questions and some testable hypotheses for future research.
The Organic Farming Manual Ann Larkin Hansen 2010-03-17 Providing expert tips on tending the land, caring for animals, and necessary equipment, Ann Larkin Hansen also covers the intricate process of acquiring organic certification and other business considerations important to a profitable operation. Discover the rewarding satisfaction of running a successful and sustainable organic farm.

Rapid Damage-Free Robotic Harvesting of Tomatoes Jizhan Liu 2021-06-23 This book shares the latest findings on this topic, systematically introduces readers to advances made in robotic harvesting around the globe, and explores the relations between the development of robotic harvesting and the respective social/economic conditions and agricultural business patterns in various countries/regions. Due to the unstructured setting it is used in, and to the significant differences between individual fruit and vegetable targets, robotic harvesting is currently considered to be one of the most challenging robotics technologies. Accordingly, research into this area involves the integration of various aspects, including biomechanics, optimization design, advanced perception and intelligent control. In addition to rapid and damage-free robotic harvesting, which reflects the multidisciplinary nature of the topic, further aspects addressed include gripping collisions with viscoelastic objects, using lasers to cut plant material, plant-fruit response to vacuum sucking and pulling, and performance probability distribution. Highlighting outstanding innovations and reflecting the latest advances in intelligent agricultural equipment in China, the book offers a unique and valuable resource.

Majalah Trubus Edisi September 2021 Redaksi Trubus 2021-09-01 Purwaceng Pimpinella pruatjan selama ini sohor sebagai tanaman untuk meningkatkan vitalitas. Sementara itu bunga telang Clitorea ternatea kaya antosianin untuk membangun kekebalan tubuh. Produsen kombuca menambahkan keduanya pada minuman kombuca sehingga menghasilkan cita rasa unik. Kombuca minuman berbahan larutan teh yang mengalami fermentasi berkat bantuan bakteri Acetobacter xylinum. Ada pula produsen yang menambahkan tanaman sarang semut Myrmecodia pendans pada kombuca. Singkat kata varian rasa kombuca amat kaya. Kombuca salah satu minuman probiotik yang terus berkembang dan kaya khasiat. Minuman probiotik lain yang juga berkhasiat adalah kefir dan yoghurt. Selama pandemi korona masyarakat lebih menyadari pentingnya menjaga imunitas tubuh antara lain dengan mengonsumsi minuman probiotik. Bukti empiris menunjukkan beberapa orang yang positif korona kondisinya terus membaik. Pada akhirnya mereka negatif setelah rutin mengonsumsi minuman probiotik. Probiotik dalam kefir seperti Lactobacillus plantarum berfungsi menjaga kesehatan pencernaan dengan menyeimbangkan mikroorganisme dalam usus. Bagaimana cara kerjanya? Probiotik itu menghasilkan asam laktat yang melekat di dinding usus. Akibatnya permukaan usus terlindungi. Harus diingat bahwa daya tahan tubuh yang kuat berawal dari pencernaan yang sehat. Oleh karena itu, tubuh yang kuat akan terhindar dari serangan penyakit seperti virus korona. Kemampuan minuman probiotik meningkatkan imunitas tubuh dapat dijelaskan secara ilmiah. Kefir kolostrum kaya akan imunoglobulin, salah satu jenis antibodi dalam tubuh. Kadar imunoglobulin dalam kefir kolostrum 80 kali lebih besar dibandingkan dengan susu sapi normal. Seperti kata peribahasa, medicus curat, natura sanat (dokter mengobati dan alam menyembuhkan). Kefir, yoghurt, dan kombuca bahan alam yang membantu proses penyembuhan penyakit akibat infeksi virus korona. Tiga minuman probiotik itu menjadi bahasan utama di Majalah Trubus edisi September 2021. Ingin mengetahui lebih detail proses produksi dan khasiat ketiga minuman probiotik? Kelas Trubus juga memberikan materi pelatihan produksi kombuca, kefir, dan yoghurt. Agricultural Automation Qin Zhang 2013-03-22 Agricultural automation is the core technology for computer-aided agricultural production management and implementation. An integration of equipment, infotronics, and precision farming technologies, it creates viable solutions for challenges facing the food, fiber, feed, and fuel needs of the human race now and into the future. Agricultural Automation: Fundamentals and Practices provides a comprehensive introduction of automation technologies for agriculture. From basics to applications, topics in this volume include: Agricultural vehicle robots and infotronic systems Precision agriculture, with its focus on efficiency and efficacy of agricultural inputs and the spatial and temporal management of agricultural systems Specific agricultural production systems, including those related to field crops, cotton, orchards and vineyards, and animal housing and production Automation relative to specific inputs in agricultural production systems, such as nutrition management and automation, automation of pesticide application systems, and automated irrigation management with soil and canopy sensing Liability issues with regard to surrounding awareness and worksite management Postharvest automation—perhaps the most advanced component of agricultural production in terms of automation and an important factor in global agriculture Agricultural mechanization, one of the top ranked engineering accomplishments in the past century, has created revolutionary change in crop production technology and made it possible to harvest sufficient products to meet the population's continuously growing needs. Continued progress is essential to the future of agriculture. This book provides an up-to-date overview of the current state of automated agriculture and important insight into its upcoming challenges.
