Leading Collaborative Architectural Practice Erin Carraher 2017-02-22 The groundbreaking guide to modern leadership in architectural practice Leading Collaborative Architectural Practice is the leadership handbook for today's design and construction professionals. Endorsed by the American Institute of Architects, this book describes the collaborative approach to leadership that is becoming increasingly prevalent in modern practice; gone are the days of authoritative "star" architects— today's practice is a brand, and requires the full input of every member of the team. This book builds off of a two-year AIA research project to provide a blueprint for effective leadership: the ability, awareness, and commitment to lead project teams who work together to accomplish the project's goals. Both group and individual hands-on exercises help facilitate implementation, and extensive case studies show how these techniques have helped real-world firms build exemplary success through collaborative teamwork and leadership. Highly illustrated and accessible, this approach is presented from the practicing architect's point of view—but the universal principles and time-tested methods also provide clear guidance for owners, contractors, engineers, project managers, and students. Build a culture of collaboration, commitment, and interpersonal awareness Adopt effective leadership techniques at the team, project, or practice level Handle conflict and resolve communication issues using tested approaches Learn how real-world projects use effective leadership to drive success The last decade has seen a sea-change in architectural leadership. New practices no longer adopt the name and identity of a single person, but create their own identity that represents the collaborative work of the entire group. Shifts in technology and changing workplace norms have made top-down management structures irrelevant, so what does it now mean to lead? Forefront presents effective contemporary leadership in the architectural practice, and real-world guidance on everyday implementation.

Building Academic Leadership Capacity Walter H. Gmelch 2015-01-08 A clear, systematic road map to effective campus leadership development Building Academic Leadership Capacity gives institutions the knowledge they need to invest in the next generation of academic leaders. With a clear, generalizable, systematic approach, this book provides insight into the elements of successful academic leadership and the training that makes it effective. Readers will explore original research that facilitates systematic, continuous program development, augmented by the authors' own insight drawn from experience establishing such programs. Numerous examples of current campus programs illustrate the concepts in action, and reflection questions lead readers to assess how they can apply these concepts to their own programs. The academic leader is the least studied and most misunderstood management position in America. Demands for accountability and the complexities of higher education leadership are increasing, and institutions need ways to shape leaders at the department chair, dean, and executive levels of all functions and responsibilities. This book provides a road map to an

effective development program, whether the goal is to revamp an existing program or build one from the ground up. Readers will learn to: Develop campus leadership programs in a more systematic manner Examine approaches that have been proven effective at other institutions Consider how these approaches could be applied to your institution Give leaders the skills they need to overcome any challenge The field of higher education offers limited opportunity to develop leaders, so institutions must invest in and grow campus leaders themselves. All development programs are not created equal, so it's important to have the most effective methods in place from day one. For the institution seeking a better way to invest in the next generation of campus leaders, Building Academic Leadership Capacity is a valuable resource.

Business and Government Relations in Africa Robert A. Dibie 2017-07-06 This book endeavors to take the conceptualization of the relationship between business, government and development in African countries to a new level. In the twenty-first century, the interests and operations of government and business inevitably intersect all over the African continent. No government, federal or state, can afford to ignore the needs of business. But what are these needs, how does business express its needs to government and what institutions organize government-business relations in African countries? How should government regulate business, or should it choose to let the markets rule? Government and Business Relations in Africa brings together many of sub-Saharan African leading scholars to address these critical questions. Business and Government Relations in Africa examines the key players in the game—federal and state governments and business groups—and the processes that govern the relationships between them. It looks at the regulatory regimes that have an impact on business and provides a number of case studies of the relationships between government and economic development around the African continent, highlighting different processes and practices. It shows the latest state of knowledge on the topic and will be of interest both to students at an advanced level, academics and reflective practitioners. It addresses the topics with regard to business-government relations and will be of interest to researchers, academics, policymakers, and students in the fields of African politics, comparative politics, public policy, business and politics, sustainable development and sustainability, economic development, and managerial economics.
