How to Write Poetry Fred Sedgwick 2005-06-01 Plenty of people want to write poetry - yet while it is not necessarily difficult to write poetry badly, it is harder to write it well. In this guide Fred Sedgwick explains - with numerous examples from successful poets - how the creative process works, from the initial impulse to write all the way through to the crafted and expressive poetry at the end.

*Will There Really Be a Morning?* Fred Sedgwick 2013-10-23 This is a book about the power of poetry to speak about the central themes of what it is to be a human being. The first part is an anthology of specially selected poems. The second part provides detailed notes for teachers on how to use these poems in the classroom. The poems in the book are about morality: how we get on, or don't get on, with each other; how we feel when we are alone; the destruction of the world we live in; childhood; celebration; fear; death; and mystery. Sharing these poems helps us to understand ourselves, and to express ourselves. The poems are selected to help to break down the barriers between curriculum subjects, and to be especially useful for religious education and personal, social and moral education. There is a mixture of the classic, the traditional and the new here, but all of the selected poems show the true power of poetry to express feelings about things that matter.

*Metaphor II* 1990-01-01 Metaphor, though not now the scholarly "mania" it once was, remains a topic of great interest in many disciplines albeit with interesting shifts in emphasis. Warren Shibles' *Metaphor: An Annotated Bibliography and History* (Bloomington, Ind. 1971) recorded the initial interest. Then *Metaphor: A Bibliography of Post-1970 Publications*, published by John Benjamins, continued the record through the mania years up to 1985 when writings proliferated as metaphor was seen to be a fundamental category in human thought and language. Five years later, there is a need for a report on the newest thinking and tendencies in the field. This need is fulfilled by *Metaphor II* which offers a comprehensive

view of information which would otherwise remain scattered throughout a numbing plethora of resources, including many sometimes-hard-to-find publications from Eastern Europe. *Metaphor II* systematically collects references of books, articles and papers published between 1985 and May 1990, and includes for completeness corrections and additions to the earlier bibliographies. Abstracts are given for many of the titles, while four indices (disciplines, semantic fields, metaphor theory and names) multiply the number of access points to the information.

*Classica et Mediaevalia 55* Ole Thomsen 2005-09-02 *Classica et Mediaevalia* is an international periodical, published annually, with articles written by Danish and international scholars. *Unriddling the Exeter Riddles* Patrick J. Murphy 2011 "Examines the Old English riddles found in the tenth-century Exeter Book manuscript, with particular attention to their relationship to larger traditions of literary and traditional riddling"--Provided by publisher.

*The Riddle in the Poem* [ivil] Gimbutas 2004 *The Riddle in the Poem* is a study of the ramifications of riddles and riddle elements in the context of selected twentieth-century poetry. It includes works by Francis Ponge, Wallace Stevens, Richard Wilbur, Rainer M. Rilke, and Henrikas Radauskas. This book enlarges the scope of the riddle as a "root of lyric" by connecting it with the folkloric concept of "riddling," essentially a question and answer series, and by tracing the influence of the root in poetic methodology. *The Riddle in the Poem* may be defined as an attempt to advance the notion, which has been discussed in previous

folkloric and literary studies, that riddles at the roots of lyrics manifest themselves in various ways.

Metaphor, Allegory, and the Classical Tradition G. R. Boys-Stones

2003-03-20 According to the theoretical accounts which survive in the rhetorical handbooks of antiquity, allegory is extended metaphor, or an extended series of metaphors. This volume provides a critical discussion of ancient definitions of allegory and metaphor as merely ornamental 'tropes'. They examine metaphor and allegory from a variety of perspectives and compare theory with ancient literary practice.

*Encyclopedia of American Folklife* Simon J Bronner 2015-03-04 American folklife is steeped in world cultures, or invented as new culture, always evolving, yet often practiced as it was created many years or even centuries ago. This fascinating encyclopedia explores the rich and varied cultural traditions of folklife in America - from barn raisings to the Internet, tattoos, and Zydeco - through expressions that include ritual, custom, crafts, architecture, food, clothing, and art. Featuring more than 350 A-Z entries, "Encyclopedia of American Folklife" is wide-ranging and inclusive. Entries cover major cities and urban centers; new and established immigrant groups as well as native Americans; American territories, such as Guam and Samoa; major issues, such as education and intellectual property; and expressions of material culture, such as homes, dress, food, and crafts. This encyclopedia covers notable folklife areas as well as general regional categories. It addresses religious groups (reflecting diversity within groups such as the Amish and the Jews), age groups (both old age and youth gangs), and contemporary folk groups (skateboarders and psychobillies) - placing all of them in the vivid tapestry of folklife in America. In addition, this resource offers useful insights on folklife concepts through entries such as "community and group" and "tradition and culture." The set also features complete indexes in each volume, as well as a bibliography for further research.

*Enigmas and Riddles in Literature* Eleanor Cook 2006-02-16 A wide-ranging and original study on how enigmas and riddles work in literature.

*An Anthropology of Puzzles* Marcel Danesi 2020-05-15 An Anthropology of Puzzles argues that the human brain is a "puzzling organ" which allows humans to literally solve their own problems of existence through puzzle format. Noting the presence of puzzles everywhere in everyday life, Marcel Danesi looks at puzzles in society since the dawn of history, showing how their presence has guided large sections of human history, from discoveries in mathematics to disquisitions in philosophy. Danesi examines

the cognitive processes that are involved in puzzle making and solving, and connects them to the actual physical manifestations of classic puzzles. Building on a concept of puzzles as based on Jungian archetypes, such as the river crossing image, the path metaphor, and the journey, Danesi suggests this could be one way to understand the public fascination with puzzles. As well as drawing on underlying mental archetypes, the act of solving puzzles also provides an outlet to move beyond biological evolution, and Danesi shows that puzzles could be the product of the same basic neural mechanism that produces language and culture. Finally, Danesi explores how understanding puzzles can be a new way of understanding our human culture.

*Reading Riddles* Brian Tucker 2010-12-16 Reading Riddles: Rhetorics of Obscurity from Romanticism to Freud explores how the riddle becomes a figure for reading and writing in early German Romanticism and how this model then enables Sigmund Freud's approach to the psyche. It traces a migration of ideas from literature to psychoanalysis and argues that the relationship between them must be situated at the methodological level

The Riddle of the World Barbara Hannan 2009 This book is an introduction to the philosophy of Arthur Schopenhauer, written in a lively, personal style. Hannan emphasizes the peculiar inconsistencies and tensions in Schopenhauer's thought--he was torn between idealism and realism, and between denial and affirmation of the individual will. In addition to providing a useful summary of Schopenhauer's main ideas, Hannan connects Schopenhauer's thought with ongoing debates in philosophy. According to Hannan, Schopenhauer was struggling half-consciously to break altogether with Kant and transcendental idealism; the anti-Kantian features of Schopenhauer's thought possess the most lasting value. Hannan defends panpsychist metaphysics of will, comparing it with contemporary views according to which causal power is metaphysically basic. Hannan also defends Schopenhauer's ethics of compassion against Kant's ethics of pure reason, and offers friendly amendments to Schopenhauer's theories of art, music, and "salvation." She also illuminates the deep connection between Schopenhauer and the early Wittgenstein, as well as Schopenhauer's influence on existentialism and psychoanalytic thought.

*Metaphor in Zulu* Eric Hermanson 2006-09-01 This study examines metaphor in Zulu in the light of conceptual metaphor theory from the perspective of a Bible translator. It then considers the possibility of translating Biblical Hebrew metaphor into Zulu. Selected Hebrew metaphors in the Book of Amos are analysed according to conceptual metaphor theory and compared with the conceptual metaphor analysis of the corresponding verses in existing Zulu translations, thereby increasing the empirical basis of the theory, and showing that it is valid for the study of both Biblical Hebrew and Zulu and a useful tool for translators.

*Nonsense and Meaning in Ancient Greek Comedy* Stephen E. Kidd

2014-06-12 This book examines the concept of 'nonsense' in ancient Greek thought and uses it to explore the comedies of the fifth and fourth centuries BCE. If 'nonsense' (*phluaria*, *ἄφροσ*) is a type of language felt to be unworthy of interpretation, it can help to define certain aspects of comedy that have proved difficult to grasp. Not least is the recurrent perception that although the comic genre can be meaningful (i.e. contain political opinions, moral sentiments and aesthetic tastes), some of it is just 'foolery' or 'fun'. But what exactly is this 'foolery', this part of comedy which allegedly lies beyond the scope of serious interpretation? The answer is to be found in the concept of 'nonsense': by examining the ways in which comedy does not mean, the genre's relationship to serious meaning (whether it be political, aesthetic, or moral) can be viewed in a clearer light.

**The Natural World in the Exeter Book Riddles** Corinne Dale 2017 An investigation of the non-human world in the Exeter Book riddles, drawing on the exciting new approaches of eco-criticism and eco-theology.

**Mixing Metaphor** Raymond W. Gibbs, Jr. 2016-03-18 Mixing metaphors in speech, writing, and even gesture, is traditionally viewed as a sign of inconsistency in thought and language. Despite the prominence of mixed metaphors, there have been surprisingly few attempts to comprehensively explain why people mix their metaphors so frequently and in the particular ways they do. This volume brings together a distinguished group of linguists, psychologists and computer scientists, who tackle the issue of how and why mixed metaphors arise and what communicative purposes they may serve. These scholars, almost unanimously, argue that mixing metaphors is a natural consequence of common metaphorical thought processes, highlighting important complexities of the metaphorical mind. *Mixing Metaphor*, for the first time, offers new, critical empirical and theoretical insights on a topic that has long been ignored within interdisciplinary metaphor studies.

**The Poetics of Transubstantiation** Douglas Burnham 2017-03-02 The essays in this collection explore the concept of 'transubstantiation', its adaptations and transformations in English and European culture from the Elizabethans to the twentieth century. Favoring an interartistic and comparative perspective, a wide range of critical approaches, from the philosophical to the semiological, from cultural materialism to gender and queer studies, are brought to bear on authors ranging from Descartes, Shakespeare and Joyce, to Macpherson, Madox Ford, and Winterson, as well as on contemporary sculpture and an Italian adaptation of Conrad for

the screen in an unusually comic vein. The volume, edited by Douglas Burnham of Staffordshire University and by Enrico Giaccherini of Pisa University, will be of interest to those concerned with the cultural history of Christianity and with the remarkable critical and theoretical insights generated by contemporary approaches to this traditional theme.

**Differentiation Strategies for Language Arts** Wendy Conklin 2009-08-15 Written specifically for language arts teachers at all levels, this resource helps facilitate the understanding and process of writing differentiated lessons to accommodate all readiness levels, learning styles, and interests.

**Metaphor and the Ancient Novel** Stephen Harrison 2005 This thematic fourth Supplementum to *Ancient Narrative*, entitled *Metaphor and the Ancient Novel*, is a collection of revised versions of papers originally read at the Second Rethymnon International Conference on the Ancient Novel (RICAN 2) under the same title, held at the University of Crete, Rethymnon, on May 19-20, 2003. Though research into metaphor has reached staggering proportions over the past twenty-five years, this is the first volume dedicated entirely to the subject of metaphor in relation to the ancient novel. Not every contributor takes into account theoretical discussions of metaphor, but the usefulness of every single paper lies in the fact that they explore actual texts while sometimes theorists tend to work out of context.

**Proverbs in African Orature** Ambrose Adikamkwu Monye 2008-03 *Proverbs in African Orature* examines how preliterate Africans handle oral literacy criticism of their proverbs. The study demonstrates that Africans employ literary styles and strategies in speaking their proverbs. It also shows that the notion and practice of literary aesthetics are indigenous to African peoples. In studying these proverbs, the author goes beyond mere translation or contextual analysis and employs a new empirical approach. The approach involves the researcher recording live scenes of proverb use, appreciation, and criticism by the people of Aniocha in Delta State, Nigeria. By examining the literary background and the present study, the author demonstrates that scholars have indeed recognized the need for this new approach but have not yet tried it. Monye is the first. The author also situates proverbs in the context of other African oral forms, drawing copious examples from the Aniocha Igbo people. This study and analysis reveals that Aniocha proverbs have literary value and that the people apply their folk critical canons in the appreciation and criticism of these proverbs. *Proverbs in African Orature* is a highly appropriate work for African Studies scholars, especially those focusing on oral literature.

**Cloth as Metaphor: (Re)Reading the Adinkra Cloth** G. F. Kojo Arthur 2017-11-30 Adinkra symbols visually integrate striking aesthetic power, evocative language, mathematical structures and philosophical concepts. The book views the Adinkra cloth symbols as a writing system. It develops themes from the texts encoded in the proverbs, stories, and maxims associated with the symbols. The themes covered include Akan

cosmology, social and political organization, social and ethical values, economics, and Akan knowledge systems. Perhaps the most modern and certainly one of the most comprehensive works on Adinkra (Oluwatoyin Adepoju).

*The Challenge of Jesus' Parables* Richard N. Longenecker 2000 A fresh look at the meaning of Jesus' parables for Christian living today. The parables recorded in the Gospels are central for an understanding of Jesus and his ministry. Yet the parables are more than simple stories; they present a number of obstacles to contemporary readers hoping to fully grasp their meaning. In this volume, thirteen New Testament scholars provide the background necessary to understand the original context and meaning of Jesus' parables as well as their modern applications, all in a manner easily accessible to general readers. Contributors: Stephen C. Barton Craig A. Evans Richard T. France Donald A. Hagner Morna D. Hooker Sylvia C. Keesmaat Michael P. Knowles Walter L. Liefeld Richard N. Longenecker Allan W. *Image and Concept* Olga Freidenberg 2006-03-07 First published in 1997.

*Image and Concept: Mythopoetic Roots of Literature* here - finally - available in English, is devoted to the origins of Greek tragedy. In it, Freidenberg develops the notion that it was the very transition from thinking based on mythological images to the kind of thinking that makes use of formal-logical concepts that resulted in the appearance of literature. With the transition from mythological thinking to conceptual thought, the content of mythological images became the texture of the new concepts. The inherited mythological forms now were reinterpreted conceptually: causalized, ethicized, generalized, abstracted. This reinterpretation, in turn, brought about poetic figurality. Folkloric material began to be differentiated from the mythological images of the past into various disciplines such as religion, philosophy, ethics, literature, and art. Yet, differentiated and reinterpreted as it was, the folkloric material remained formally preserved in poetic image, structure, and plot.

*Meaning and Truth in African Philosophy* Grivas Muchineripi Kayange 2018-11-23 This book offers a new way of doing African philosophy by building on an analysis of the way people talk. The author bases his investigation on the belief that traditional African philosophy is hidden in expressions used in ordinary language. As a result, he argues that people are engaging in a philosophical activity when they use expressions such as taboos, proverbs, idioms, riddles, and metaphors. The analysis investigates proverbs using the ordinary language approach and Speech Act theory. Next, the author looks at taboos using counterfactual logic, which studies the meaning of taboo expressions by departing from a consideration of their structure and use. He argues that the study of these figurative expressions using the counterfactual framework offers a particular understanding of African philosophy and belief systems. The study also investigates issues of meaning and rationality departing from a study on riddles, explores conceptual metaphors used in conceptualizing the notion of politics in modern African political thought, and examines language and marginalization of women and people with disabilities. The book differs from other works in African philosophy in the sense that it does not claim that Africans have a philosophy as is commonly done in most studies. Rather, it reflects and unfolds philosophical elements in ordinary language use. The book also builds African Conception of beauty and truth through the study of language.

Orature and Yoruba Riddles A. Akinyeme 2016-02-09 Orature and Yorùbá Riddles takes readers into the hitherto unexplored undercurrents of riddles in Africa. Because of its oral and all too often ephemeral nature, riddles have escaped close scrutiny from scholars. The strength of the Yorùbá as the focus of this study is impressive indeed: a major ethnic group in Africa, with established connections with the black diaspora in North America and the Caribbean; a rich oral and written culture; a large and diverse population; and an integrated rural-urban society. The book is divided into six chapters for readers' convenience. When read in sequence, the book provides a comprehensive, holistic sense of Yorùbá creativity where riddles are concerned. At the same time, the book is conceived in a way that each chapter could be read individually. Therefore, those readers seeking understanding of a specific type of riddle may target a single chapter appearing most relevant to her/his curiosity.

**Similes, Puns and Counterfactuals in Literary Narrative** Jennifer Riddle Harding 2017-04-21 In this study, Jennifer Riddle Harding presents a cognitive analysis of three figures of speech that have readily identifiable

forms: similes, puns, and counterfactuals. Harding argues that when deployed in literary narrative, these forms have narrative functions—such as the depiction of conscious experiences, allegorical meanings, and alternative plots—uniquely developed by these more visible figures of speech. Metaphors, by contrast, are often "invisible" in the formal structure of a text. With a solid cognitive grounding, Harding's approach emphasizes the relationship between figurative forms and narrative effects. Harding demonstrates the literary functions of previously neglected figures of speech, and the potential for a unified approach to a topic that crosses cognitive disciplines. Her work has implications for the rhetorical approach to figures of speech, for cognitive disciplines, and for the studies of literature, rhetoric, and narrative.

**Lyric Wonder** James Biester 2019-05-15 James Biester sees the shift in late Elizabethan England toward a witty, rough, and obscure lyric style—metaphysical wit and strong lines—as a response to the heightened cultural prestige of wonder. That same prestige was demonstrated in the search for strange artifacts and animals to display in the wonder-cabinets of the period. By embracing the genres of satire and epigram, poets of the Elizabethan court risked their chances for political advancement, exposing themselves to the danger of being classified either as malcontents or as jesters who lacked the gravitas required of those in power. John Donne himself recognized both the risks and benefits of adopting the 'admirable' style, as Biester shows in his close readings of the First and Fourth Satyres. Why did courtier-poets adopt such a dangerous form of self-representation? The answer, Biester maintains, lies in an extraordinary confluence of developments in both poetics and the interpenetrating spheres of the culture at large, which made the pursuit of wonder through style unusually attractive, even necessary. In a postfeudal but still aristocratic culture, he says, the ability to astound through language performed the validating function that was once supplied by the ability to fight. Combining the insights of the new historicism with traditional literary scholarship, Biester perceives the rise of metaphysical style as a social as well as aesthetic event.
