Learning to Read across Languages and Writing Systems Ludo Verhoeven 2017-10-12 Around the world, children embark on learning to read in their home

language or writing system. But does their specific language, and how it is written, make a difference to how they learn? How is learning to read English similar

to or different from learning in other languages? Is reading alphabetic writing a different challenge from reading syllabic or logographic writing? Learning to

Read across Languages and Writing Systems examines these questions across seventeen languages representing the world's different major writing systems.

Each chapter highlights the key features of a specific language, exploring research on learning to read, spell, and comprehend it, and on implications for

education. The editors' introduction describes the global spread of reading and provides a theoretical framework, including operating principles for learning to

read. The editors' final chapter draws conclusions about cross-linguistic universal trends, and the challenges posed by specific languages and writing systems.

Teaching Literacy in the Visible Learning Classroom, Grades K-5 Douglas Fisher 2017-01-20 It could happen at 10:10 a.m. in the midst of interactive writing, at

2:30, when listening to readers, or even after class, when planning a lesson. The question arises: How do I influence students' learning—what's going to

generate that light bulb Aha-moment of understanding? In this sequel to their megawatt best seller Visible Learning for Literacy, Douglas Fisher, Nancy Frey,

and John Hattie help you answer that question by sharing structures and tools for effective literacy instruction that have high-impact on learning—and insights

on which stage of learning they have that high impact. With their expert lessons, video clips, and online resources, you can deliver sustained, comprehensive

experiences in phonics, guided reading, interactive writing, content-area discussions—in virtually all you teach: Mobilizing Visible Learning: Use lesson design

strategies based on research that included 500 million plus students to develop self-regulating learners able to "see" the purpose of what they are learning—and

their own progress. Teacher Clarity: Articulate daily learning intentions, success criteria, and other goals; understand what your learners understand, and design

high-potency experiences for all students. Direct Instruction: Embrace modeling and scaffolding as a critical pathway for students to learn new skills and

concepts. Teacher-Led Dialogic Instruction: Guide reading, writing, and thinking by using questioning and other teacher-led discussion techniques to help

learners to clarify thinking, disagree respectfully, and reach consensus. Student-Led Dialogic Learning: Foster cognitive growth with peer-mediated learning

—reciprocal teaching, QAR, fish bowl, and more. Independent Learning: Ensure that students deepen learning by designing relevant tasks that enable them to

think metacognitively, set goals, and develop self-regulatory skills. Tools to Use to Determine Literacy Impact: Know what your impact truly is with these

research-based formative assessments for K-5 learners. With Teaching Literacy in the Visible Learning Classroom, take your students from surface to deep to

transfer learning. It's all about using the most effective practices—and knowing WHEN those practices are best leveraged to maximize student learning.

Spelling Patterns and Rules for 5th Graders Joanne Rudling 2018-08-03 This colorful, fun book is ideal for kids (ages 10-11) who are struggling with American spelling and phonics. It focuses on areas that other spelling books and schemes ignore: - improving visual memory, - using memory tricks, - noticing letter patterns, - knowing spelling rules & exceptions, - building words with prefixes and suffixes, - understanding the history of spelling and why spelling is the way it is. Using a combination of well-known, proven literacy techniques and spelling strategies, this book will help kids learn, remember, and improve their spellings while reinforcing and building: spelling knowledge, confidence, and love of spelling and writing. The book is a great resource for teachers and tutors, too, because it explains why these "tricky" spellings are the way they are, including the rules and history of them - so you can answer those awkward questions about them. The book also provides some great ideas for exercises, group work, and games in the classroom. The "curriculum" for this book has been taken from the UK statutory curriculum for this age group, and consultations with US teachers. Reviews/feedback Graham J Spooner of The Sensible Tuition CompanyI enjoyed reading through the first little section actually with the 'tricks and tips' for how to develop your spelling. This is exactly the sort of thing that my students are asking me for advice on regularly - and there are a lot of things in here that I know will be directly useable in lessons. I like the gap filling exercises - again, something like this makes the book a GREAT resource for a tutor or teacher as we could lift/adapt these exercises for 1:1 work. I like the way you've really opened up the material with the word lists. Again (speaking from the perspective of a private tutor) I think this is particularly useful as a resource to test a student's understanding (perhaps bringing these words into a game of hangman or other gap fill exercises). The grammar bits were quite memorable, I like your no-nonsense approach and voice that you have here. It's just useful stuff delivered without unnecessary padding but still accessible! I think that overall the book definitely fills a 'gap' by getting students actually looking at words, decoding them and building their intuition about how they are made, remade and deconstructed. It's also got a nice balance in its content in that it is accessible to a student at 10-11, but also useful for a tutor to adapt and

create exercises from without much stress. I really like the use of colour throughout. I also really enjoyed the history bits too (e.g. about Latin roots of words) - very interesting. From Jessica and Roman McA.My son didn't lose concentration and worked for 20 mins without one single complaint. He really liked the word searches. He said writing sentences and drawing pictures was fun. He also liked filling in the missing letters, which I think is a brilliant way of really taking in the sequence of the letters. Roman scored really well on the tests, which is pretty good considering he hates spelling! Maria Parada (teacher)We definitely need this type of program for students. We currently do not have a spelling program in our district. Some teachers teach spelling, unfortunately most do not. I am the type of learner that needs to understand why something is the way it is. I really only got that from your program. I appreciate you so MUCH! Many students needs to know why spelling is the way it is, and not just memorize words.

Teaching Literacy in First Grade Diane Lapp 2005-05-05 First grade is a year of important new experiences for students and teachers alike. Some students will arrive knowing how to read, others will know a few letters of the alphabet, and most will be somewhere in between. Including dozens of reproducibles, this book guides first-grade teachers in the many decisions they face about how to orchestrate effective, appropriate, and engaging instruction. A special strength of the book is the authors' deep understanding of the oral language base of literacy learning - both reading and writing - and their expertise in differentiating instruction for English language learners.
