## INTRODUCTION 1-1.1

Purpose. This chapter provides a general history of the development of military diving operations. 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past. 1-1.3 Role of the U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific

requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing

and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.

Wij, de overheid Davied van Berlo 2012-11-28 De netwerksamenleving. Iedereen heeft het erover, maar wat

betekent het? Welke gevolgen heeft de vernetwerking van de samenleving voor de overheid? De publieke zaak wordt steeds meer een cocreatie tussen overheid en samenleving, maar hoe gaat die samenwerking eruitzien en kan de overheid daar überhaupt nog wel in sturen? In zijn derde boek onderzoekt Davied van Berlo, schrijver van *Ambtenaar 2.0* en *Ambtenaar 2.0 beta*, de rol van de overheid in de netwerksamenleving. “Wij, de overheid” biedt een nieuw perspectief op de werking van de overheid en geeft bestuurders en ambtenaren handvatten om aan die nieuwe rol invulling aan te geven.
