Scope. This RPSTL lists and authorizes spares and repair parts; special tools; special Test, Measurement, and Diagnostic Equipment (TMDE); and other special support equipment required for performance of aviation unit and aviation intermediate maintenance of the AH-64A Advanced Attack Helicopter. It authorizes the requisitioning, issue, and disposition of spares, repair parts and special tools as indicated by the Source, Maintenance and Recoverability (SMR) codes. 2. General. In addition to Section I, Introduction, this Repair Parts and Special Tools List is divided into the following sections: a. Section II. Repair Parts List. A list of spares and repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. Bulk materials are listed in item name sequence. b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL (as indicated by Basis of Issue (BOI) information in DESCRIPTION AND USABLE ON CODE (UOC) column) for the purpose of maintenance. c. Section IV. Cross-reference Indexes. A list, in National Item Identification Number (NIIN) sequence, of all National Stock Numbers (NSN) appearing in the listing, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance. The figure and item number index lists figure and item numbers in alphanumeric sequence and cross-references NSN, FSCM/CAGE and part numbers.

A Study of the Air Force Maintenance Technical Data System Republic Aviation Corporation 1962 This report details the research on preparation, production, distribution, evaluation and verification of Air Force maintenance technical data. It highlights the impact of management on the procurement of accurate, timely, and economical data and identifies the areas in which management was found to be deficient. It points out the specific shortcomings in the data, in its preparation, distribution, and use. Finally, the report recommends actions considered necessary to first, improve management of the overall

technical order system, and second to enhance the quality, usefulness, and timeliness of the data produced.

Apollo by the Numbers Richard W. Orloff 2000 This work is a unique collection of valuable statistical information about Project Apollo. It includes a chapter (about 20 pages each) for Apollo 1 through Apollo 17. There are several data tables for each mission, plus a 50-page section with additional statistics and tables that merge data for each mission so you can easily make comparisons. Tables include launch and ascent data, fuel consumption, stage impact locations, very detailed mission timelines, and much more.

Acquisition and Development of System Command (SYSCOM) Technical Manuals 2003 This manual describes how to acquire, develop, and maintain System Command (SYSCOM) Technical Manuals (TMs) for SYSCOM sponsors such as Naval Sea Systems Command (NAVSEA) and Space and Naval Warfare Systems Command (SPAWAR). TMs are the primary information source for technical training, installation, operation, testing, maintenance, and repair associated with NAVSEA/SPAWAR systems or equipment. Unless adequate and suitably written TMs already exist, new manuals must be developed and procured as part of all NAVSEA/SPAWAR systems, equipment, or major component acquisitions. No other forms of technical information will be purchased without specific justification. This manual is written for Space and Naval Warfare Systems Center, San Diego (SCC San Diego) employees and shows how to perform the following tasks when developing SYSCOM TMs: (1) Acquire SYSCOM TMs; (2) Create a Technical Manual Contract Requirement (TMCR) or Technical Manual SEATASK/SPATASK

Requirement (TMSR) using the Naval Systems Data Support Activity's (NSDSA) homepage; (3) Obtain Technical Manual Identification Numbers (TMINS), National Stock Numbers (NSNs), and Volume Identification Numbers (VINs) from NSDSA; (4) Support and maintain SYSCOM TMs; (5) Update the Technical Data Management Information System (TDMIS) database; (6) Ensure that TM management principles are imposed on contractors, subcontractors, field activities, and other Government activities as necessary and appropriate; (7) Provide for sustainment throughout the life cycle through Technical Manual Management Authority (TMMA) assignment; (8) Ensure Reading Grade Level (RGL) appropriate for readers of the TM; and (9) Dispose of TMs in accordance with SECNAVINST 5510.36, Department of the Navy Information Security Program Regulation and NAVSEA/SPAWAR S0005-AA-PRO-010/E0005-AC-HBK-010, Operations and Life Cycle Procedures, Section 16, Paragraph 16.6.

<http://www.cdxauto.com/ContactUs> to access a list of international CDX Automotive Account Managers. Electrical and Electronic Systems Tasksheet Manual for NATEF Proficiency is designed to guide automotive students through the tasks necessary to meet National Automotive Technicians Education Foundation (NATEF) requirements for National Institute for Automotive Service Excellence (ASE) Standard 6: Electrical and Electronic Systems. Organized by ASE topic area, companion tasks are grouped together for more efficient completion, and are clearly labeled with CDX and NATEF task numbers and the NATEF priority level to help students easily manage responsibilities. This manual will assist students in demonstrating hands-on performance of the skills necessary for initial training in the automotive specialty area of electrical and electronic systems. It can also serve as a personal portfolio of documented experience for prospective employment. Used in conjunction with CDX Automotive, students will demonstrate proficiency in electrical/electronic fundamentals, diagnosis, service, and repair.

Today's Technician: Basic Automotive Service and Systems, Classroom Manual and Shop Manual Chris Hadfield 2020-02-25 The Sixth Edition of BASIC AUTOMOTIVE SERVICE & SYSTEMS includes a Classroom Manual and a Shop Manual to provide a comprehensive, accessible overview of automotive systems to prepare readers for all aspects of work in the field. Updated to align with Task Lists for the latest ASE Education Foundation requirements, the Sixth Edition covers emerging technologies such as hybrid vehicles and electronic engine controls, as well as current information on the global automotive industry and the role of the technician within it. The Classroom Manual explores the theories of operation behind each automotive system, while the Shop Manual covers relevant diagnostic, testing, and repair procedures. Assuming no prior knowledge of automotive technology, these clear and engaging resources combine to provide a thorough introduction to both fundamental theory and its real-world applications in specific skills and maintenance procedures. Description and Application Guide for NAVSEA Standard Technical Manual Identification Numbering System (TMINS). First Revision NAVAL SEA SYSTEMS COMMAND WASHINGTON D C. 1978 The NAVSEA Standard Technical Manual Identification Numbering System (TMINS) has been promulgated to initiate the implementation of a single significant numbering system for technical manuals procured by the Navy Sea Systems Command. The use of the single numbering system will eliminate the confusion in the Fleet that now results from the different numbering systems in use by the former Naval Ships and Naval Ordnance Commands. In addition, the single numbering system will aid the standardization of cataloging within the Systems Command and will simplify the interfaces between TM data collection and TM information systems. This guide has two purposes: (1) to explain the concepts of the TMINS System and the composition of the TMINS number, and (2) to provide the necessary data for proper application of TMINS numbers. The guide is divided into four sections. Section I provides the explanation of the system and the composition of the number. Section II presents the TMINS application data in the form of alphanumeric codes and code groups. Section III summarizes, by means of a definitive form, the system, equipment and project-related information necessary for proper assignment of a TMINS number. Section IV is an alphabetical index of subjects and commodities within the purview of the TMINS System.

A+ Guide to IT Technical Support (Hardware and Software) Jean Andrews 2016-01-06 This step-by-step, highly visual text provides a comprehensive introduction to managing and maintaining computer hardware and software. Written by best-selling author and educator Jean Andrews, A+ Guide to IT Technical Support, 9th Edition closely integrates the CompTIA+ Exam objectives to prepare you for the 220-901 and 220-902 certification exams. The new Ninth Edition also features extensive updates to reflect current technology, techniques, and industry standards in the dynamic, fast-paced field of PC repair and information technology. Each chapter covers both core concepts and advanced topics, organizing material to facilitate practical application and encourage you to learn by doing. The new edition features more coverage of updated hardware, security, virtualization, new coverage of cloud computing, Linux and Mac OS, and increased emphasis on mobile devices. Supported by a wide range of supplemental resources to enhance learning with Lab Manuals, CourseNotes online labs and the optional MindTap that includes online labs, certification test prep and interactive exercises and activities, this proven text offers students an ideal way to prepare for success as a professional IT support technician and administrator.
