Besieged William G. Howell 2005-04-01 School boards are fighting for their survival. Almost everything that they do is subject to regulations handed down from city councils, state boards of education, legislatures, and courts. As recent mayoral and state takeovers in such cities as Baltimore, Chicago, and New York make abundantly clear, school boards that do not fulfill the expectations of other political players may be stripped of what few independent powers they still retain. Teachers unions exert growing influence over board decision-making processes. And with the passage of the No Child Left Behind Act, the federal government has aggressively inserted itself into matters of local education governance. *Besieged* is the first full-length volume in many years to systematically examine the politics that surround school boards. A group of highly renowned scholars, relying on both careful case studies and quantitative analyses, examine how school boards fare when they interact with their political superiors, teachers unions, and the public. For the most part, the picture that emerges is sobering: while school boards perform certain administrative functions quite well, the political pressures they face undermine their capacity to institute the wide-ranging school reforms that many voters and local leaders are currently demanding.

An Unbroken Educational Apartheid Legacy David E. Morgan Ph.D. 2015-03-17 This is a thought-provoking book on the black-white academic achievement gap in Chicago's predominantly black communities of color and what highly effective school boards can do to change it. In this book, the reader will be powerfully enlightened by a civil and human rights debate that calls for effective leadership in our schools, beginning with effective school boards. The primary agenda of effective school boards is raising student achievement performance levels and engaging the school district community to attain that goal. These instructive analyses of effective school board leadership builds on the research and wisdom of great leaders. Simultaneously, it develops a breath of fresh air for school reformers who seek to implement a new model and escape the insanity and pathology inherent in school board dysfunctions and violations of our civil and human rights which prevents progress in Chicago's south suburban communities of color. In both highs and lows of awesome moments, as educational reform leaders and school board members, we are in a strategic leadership position to help school boards carry out their essential responsibilities for

creating equity and excellence in public education. In doing so, highly effective school leaders can team with our school board leaders to lead our school district communities in preparing all students to succeed in a rapidly changing global society. School board members doing the same things over and over again and then expecting different results in academic outcomes is the definition for insanity. Education is freedom. In an era of mass educational apartheid with its consequent mass incarceration of blacks that has surpassed the enforced chattel bondage of slavery's peak numbers in 1860, this book addresses a subject that is critically essential, timely, and in need of immediate attention for the security, success, and ultimate survival of black America. As the problems of the academic under-achievement gap is addressed in this book, it is also essential that school boards, educators, and community and national leaders accept reality, to view the problem in its true perspective, to contemplate it as it is, in providing essential solutions toward removing limiting and limited school boards' dysfunctions, obstructions, and other barriers to academic achievement in effective school board leadership. Supporting educational excellence will thereby produce more African American scholars in mathematics, science, and in many other disciplines. This book will provide information and focus on some key action areas that successful school boards in America and around the world have focused their attention on: Vision, Standards, Assessment, Resource Alignment, Climate, Collaboration, and Continuous Academic Improvement.

Religious Education in Public Schools: Study of

Comparative Law José Luis Martínez López-Muñiz

2006-01-17 This publication is a compilation of studies on religious instruction in state schools. As Europe goes through a "social revolution" with the influence of the church and religious instruction in state schools being opened to discussion, this book describes the diversity between states and analyzes the legislative basis of religious instruction in various countries. The comparative analyses will be of value to researchers in educational research and to educational policymakers.

Studied Ignorance Herbert N. Foerstel 2013-05-23 Despite concerted efforts from our educators, administrators, and government, American education continues to struggle. The author of this work argues that the decline can be traced to censored curricula, inaccurate textbooks, test-driven evaluations, and increasing poverty among the student population.

Liberty, Retrenchment and Reform Eugenio F. Biagini 2004-05-03 In common with republicanism or socialism in continental Europe, Liberalism in nineteenth-century Britain was a mass movement. By focussing on the period between the 1860s and the 1880s, this book sets out to explain why and how that happened, and to examine the people who supported it, their beliefs, and the way in which the latter related to one another and to reality. Popular support for the Liberal party was not irrational in either its objectives or its motivations: on the contrary, its dissemination was due to the fact that the programme of reforms proposed by the party leaders offered convincing solutions to some of the problems perceived as being the most urgent at the time. This is a revealing, innovative synthesis of the history of popular support for the Liberal party, which emphasises the extent to which Liberalism stood in the common heritage of European and American democracy.

School Library Journal 2006-04

School Segregation in Western North Carolina Betty Jamerson Reed 2011-10-14 Although African Americans make up a small portion of the population of western North Carolina, they have contributed much to the area's physical and cultural landscape. This enlightening study surveys the region's segregated black schools from Reconstruction through integration and reveals the struggles, achievements, and ultimate victory of a unified community intent on achieving an adequate education for its children. The book documents the events that initially brought blacks into Appalachia, early efforts to educate black children, the movement to acquire and improve schools, and the long process of desegregation. Personnel issues, curriculum, extracurricular activities, sports, consolidation, and construction also receive attention. Featuring commentary from former students, teachers and parents, this work weighs the value and achievement of rural segregated black schools as well as their significance for educators today.

Vanishing School Boards Patrick Rice 2014-05-14 Since Nation at Risk, NCLB and RTT, the once thought sacred institution of school boards as catalysts to ensure local control of schools is being redefined and are under heavy attack. Increasingly, school boards are disappearing from the discussion of promoting student achievement and their role as educational decision-makers have significantly declined. The aims of public education are gradually being federalized and privatized. In *Vanishing School Boards*, author Patrick Rice give various reasons for the descent of school boards, reasons why school boards are vital, the importance of board training and how the superintendent can assist the board in their mission of delivering a quality education to all students.

Contemporary Perspective on Capital in Educational Contexts RoSusan D. Bartee 2010-08-01 The edited volume, *Contemporary Perspectives on Capital in Educational Contexts*, is timely in its unique and appropriate analyses of the prevailing internal and external dynamics of capital as indicative of the type of currency within institutional structures or the currency among individual stakeholders of education. The intersection of capital and currency emerges similarly and differently within the American compulsory-based system of K-12 and the choice-based system of higher education. More specifically, *Contemporary Perspectives on Capital in Educational Contexts* disentangles the broader challenges and opportunities of the institution of education and the individuals who comprise. Emerging insights from the analyses provide an informed basis for ascertaining the rules of engagement and means of negotiation for the respective constituencies. With that said, this volume essentially responds to three important questions: 1) What are the tenets of capital and currency in public schools and higher education?; 2) How do institutions and individuals navigate those tenets?; and 3) What general and specific implications do capital hold for the educational pipeline and beyond? These questions provide a useful framework for engaging critical conversations about the dynamics of capital while offering perspectives about how to improve the quality of currency in K-12 or colleges and universities. These questions further serve as a basis for eliciting more questions toward the consideration capital as both a conceptual construct and applicable model. *Contemporary Perspectives on Capital in Educational Contexts*, too, is an expansion of the work of *School matters: Why African American students need multiple forms of capital*, where Bartee & Brown (2006) examines how the acquisition and possession of capital equips African American students in a highperforming, high-achieving magnet school in Chicago for competitiveness in school-generated and non-school generated activities. Success experienced by the students and the school become associated with the academic rigor and reputation while any shortcomings reflect an inadequate capacity of the school or the student to appropriately engage the other. *School matters: Why African American students need multiple forms of capital* (2006) further introduces an initial exploration of different forms of capital as producer (improve the status quo through inputs), consumer (participant based upon outputs), and regulator (maintain the status quo through the process) within the educational system. The multifaceted role of capital demonstrates its span of influence for institutional and

individual capacities.

The Goslings: A Study of the American Schools Upton Sinclair 2022-06-13 This book aims to demonstrate how the invisible pressure from prominent corporations controls American society and the education system. The book was written in response to public comment by Dr Tildsley in May 1922 that schools are no longer run to the benefit of children. This statement is the book's thesis, which is informative and persuasive. It examines details of the schooling system, the curriculum and the politics surrounding schools in America.

Mis-education in Schools Howard Good 2007 In *Mis-Education in Schools: Beyond the Slogans and Double-Talk*, Howard Good uses his experiences as a parent, teacher, and school board member to explore what's gone wrong with education and how to make it right. He takes the reader inside classrooms, locker rooms, school board meetings, and parent-teacher conferences to discover how our children are being educated -or, more often than not, miseducated. Good demonstrates that despite the "children first" rhetoric of educators, students are often ill served by teachers, principals, guidance

counselors, coaches, and school boards. Readers will be challenged by Good's candid perspective and engaged by his energetic prose. *Mis-Education in Schools* isn't just another education book. It cuts through the double talk that characterizes so much of the debate over education today, exposing the troubling gap between what schools preach and what they actually practice.

The State of the System Paul W. Bennett 2020-09-23 Over the last fifty years, Canada's public schools have been absorbed into a modern education system that functions much like Max Weber's infamous iron cage. Crying out for democratic school-level reform, the system is now a centralized, bureaucratic fortress that, every year, becomes softer on standards for students, less accessible to parents, further out of touch with communities, and surprisingly unresponsive to classroom teachers. Exploring the nature of the Canadian education order in all its dimensions, *The State of the System* explains how public schools came to be so bureaucratic, confronts the critical issues facing kindergarten to grade 12 public schools in all ten provinces, and addresses the need for systemic reform. Going beyond a diagnosis of the stresses, strains, and ills present in the system, Paul Bennett proposes a bold plan to re-engineer schools on a more human scale as the first step in truly reforming public education. In place of school consolidation and managerialism, one-size-fits-all uniformity, limited school choice, and the "success-for-all" curriculum, Bennett advocates for a new set of priorities: decentralize school governance, deprogram education ministries and school districts, listen to parents and teachers, and revitalize local education democracy. Tackling the thorny issues besetting contemporary school systems in Canada, *The State of the System* issues a clarion call for more responsive, engaged, and accountable public schools.
