The text follows a logical structure-based organization. Beginning with a general overview, chapters then cover the protoplast, cell wall, and meristems, through to phloem, periderm, and secretory structures. Drug Eruption Reference Manual 2000 Jerome Z. Litt 2000-02-15 New, expanded, color illustrated Millennium 2000 edition of Dr. Jerome Litt's immensely popular, universally acclaimed reference book on drug eruptions. Published in large-format softcover binding with a full-color atlas section showing the most commonly encountered reactions, this new edition catalogs more than 700 generic and over 4,200 trade-name drugs (cross-referenced for quick look-up) with their adverse cutaneous reactions: skin, hair, nails, mucous membranes, and others. New in the 2000 edition are sections on herbals, botanicals, trace elements and supplements, more reaction patterns and the drugs responsible for them, including indications, category, half-life and major interactions and even more color illustrations. The updated literature citations now include some 16,000 references, many pre-Medline and some going back as far as 1922. This Millennium 2000 edition contains 332 references to 64 different reaction patterns caused by carbamazepine, 177 references to lupus erythematosus caused by procainamide, and thousands more. Indexed by both generic and proprietary drug names as well as by reaction patterns. Published annually. JAMA Review: "For physicians who frequently have to determine the cause of a cutaneous eruption in the hospitalized or ambulatory patient, the Drug Eruption Reference Manual is useful for accessing the most up-to-date literature and promptly discontinuing the drug most likely to be the cause. As a clinician and teacher, I find the book essential in my practice and for clinical education." - Larry E. Millikan, MD Journal of the American Academy of Dermatology Review: "Drug Eruption Reference Manual is an outstanding reference book...receives my highest recommendation and is placed in the 'must have' category of medical textbooks." - Bradley W. Boatman, M.D. Cutis Review: "If you can have only one book in your office, it should be Litt's Drug Eruption Reference Manual." - Walter B. Shelley, M.D., Ph.D. Journal of Cutaneous Medicine and Surgery Review: "The large list of reactions reported with each drug is pure gold. . . . well worth the money." - Neil Shear, M.D.

Seismic Behaviour and Design of Irregular and Complex Civil Structures III Dietlinde Köber 2020-03-06 This book presents state-of-the-art knowledge on problems of the effects of structural

irregularities on their seismic response. It also covers specific spatial and rotational seismic loads on these structures. Rapid progress in respective research on irregular structures and unconventional seismic loads requires prompt updates of the state of the art in this area. These problems are of particular interest to both researchers and practitioners because these are non-conservative effects compared with the approach of the traditional seismic design (e.g. Eurocode 8, Uniform Building Code etc.). This book will be of particular interest to researchers, PhD students and engineers dealing with design of structures under seismic excitations.

Geriatric in de fysiotherapeutische praktijk John Scott & Co 1999-08-31 Door de toenemende vergrijzing neemt het aantal oudere patiënten enorm toe en daarmee de kans dat fysiotherapeuten op allerlei werkerreinen (preventie, thuiszorg, algemene praktijk, ziekenhuizen, zorginstellingen) met ouderen te maken krijgen. Dit betekent dat fysiotherapeuten toegang moeten krijgen tot belangrijke klinische informatie die nodig is om ouderen met dreigende stoornissen en beperkingen zo adequaat mogelijk te begeleiden. Dit oorspronkelijk Amerikaanse boek (Geriatric Physical Therapy, A clinical approach) voorziet in deze behoefte en is een bundeling van een grote hoeveelheid toegepaste wetenschappelijke kennis over normale en pathologische verouderingsprocessen, klinische vraagstukken en specifieke implicaties daarvan voor de behandeling van oudere patiënten.

Gravity, Geoid and Space Missions Christopher Jekeli 2006-01-27 The IAG International Symposium on Gravity, Geoid, and Space Missions 2004 (GGSM2004) was held in the beautiful city of Porto, Portugal, from 30 August to 3 September 2004. This symposium encompassed the themes of Commission 2 (Gravity Field) of the newly structured IAG, as well as interdisciplinary topics related to geoid and gravity modeling, with special attention given to the current and planned gravi- dedicated satellite missions. The symposium also followed in the tradition of mid-term meetings that were held between the quadrennial joint meetings of the International Geoid and Gravity Commissions. The previous mid-term meetings were the International Symposia on Gravity, Geoid, and Marine Geodesy (Tokyo, 1996), and Gravity, Geoid, and Geodynamics (Banff, 2000). GGSM2004 aimed to bring together scientists from different areas in the geosciences, working with gravity and geoid related problems, both from the theoretical and practical points of view. Topics of interest included the integration of heterogeneous data and contributions from satellite and airborne techniques to the study of the spatial and temporal variations of the gravity field. In addition to the special focus on the CHAMP, GRACE, and GOCE satellite missions, attention was also directed toward projects addressing topographic and ice field mapping using SAR, LIDAR, and laser altimetry, as well as missions and studies related to planetary geodesy.
